Dear Readers of Mahisco,

The printing of the 2002 Mahisco officially marks the 75th anniversary of the publication. Although Mahisco existed off and on prior to 1927, it was in the 1927-1928 school year when the book resumed publication with 20 students and under the direction of Ms. Opal Sherman. Since 1927, Mahisco has found its way in to the hands and hearts of MCHS students and supporters without missing a beat. The forward found in that book is as appropriate today as it was back then. **This yearbook...has been made possible by the generous support of the merchants of Madison and the students of the high school. To these people we offer our work and our books, which is now yours.**

Ode to My Junior Year

Goodbye to my Junior Year

Goodbye to early mornings...

the tone of the alarm clock
the cold floor on my bare feet
the on-the-go breakfasts
and scraping the frost off my windshield

Goodbye to the crowded halls

the slow walkers
the narrow doorways
the group standing RIGHT IN MY WAY!

Goodbye to my link to the mathematical world

KA, Opie Wayne, projectile velocity
microbiology and all the animal kingdoms
espanol, terze rime, short stories and Dante

Goodbye to lunch

the overflowing tables
the cold fries, pre-packaged salads
and the half-full chip bags

Goodbye to the bathrooms

the putrid pink of the walls
the bad reputations etched on the doors
the lack of soap to wash your hands
the knowledge that someone has just been smoking in the stall
that you are in

Goodbye to the temperature zones

the air conditioner targeting you to freeze this block
the stuffy heat of E Wing
the bitter cold of B Wing

Goodbye to the administration

the walkietalkies
standing guard over the cafeteria
demanding that stupid yellow pass

Goodbye to the people

the funny ones
the nice ones
the mean ones
the quiet ones

Goodbye to this school

Until next year...

Retrospective

At 8:48 a.m. on Sept. 11, a hijacked American Airlines commercial jetliner crashed into one of New York City's World Trade Center towers. At 9:05 a.m., a second plane crashed into the second tower. As people tried to evacuate, the impact and heat from the crash caused the first tower to tumble to the ground in enormous clouds of smoke and debris. The second tower collapsed shortly thereafter.

By 9:40 a.m., a third hijacked plane crashed into the Pentagon, and a fourth crashed one hour later near a wooded area in Western Pennsylvania. Nearly 4,200 lives were lost.

The hijackings were part of an intended multitude of terrorist attacks on America headed by Islamic fundamentalist and wanted terrorist Osama Bin Laden and his al Qaeda terrorist network. Bin Laden has been making open threats against America for many years, demanding the U.S. withdraw involvement from the Middle East.

President Bush insisted that the Taliban (the ruling government of Afghanistan) turn over Bin Laden to the U.S. When they repeatedly refused, U.S. and allied British forces began weeks of bombing Afghan cities, including its capital city Kabul, successfully toppling the Taliban regime and destroying Afghan havens for terrorists.

The 2001 baseball season was touted by some as one of the most exciting offensive seasons in years. The World Series ended in a surprise victory for the Arizona Diamondbacks, who beat the New York Yankees 3-2 in the seventh inning thanks to an RBI single by Luis Gonzalez. San Francisco Giants star hitter Barry Bonds finished up with 73 home runs, breaking Mark McGwire's 1998 record of 70 in one season. Bonds also became the first player to win four Most Valuable Player Awards.

More than 30 television networks along with 8,000 radio stations and Internet sites across the country simultaneously broadcast the live special "America: A Tribute to Heroes." The show was a two-hour, star-studded telethon that raised more than \$150 million for the victims of the Sept. 11 terrorist attacks.

Advanced Cell Technology President and CEO Michael West announced the company successfully cloned a human embryo for the purpose of mining stem cells. Throughout the year, the controversy over the ethics of stem cell usage, a process which may help scientists treat serious diseases, has grown because the cells are taken from human embryos, causing the embryo to be destroyed.
